The enterprise INGA mbH was founded in 1986 out of a research cooperation with the University of Applied Sciences (Fachhochschule) Braunschweig/Wolfenbüttel. As member of the Zacharias Group, Hameln we cover the whole range of Building Services Engineering.

Due to our experience in the Project Business we can offer you successful, craft-overlapping and field-tested solutions for most different areas.

Our expert knowledge bases on a very good professional competence, on continuous further education and on knowledges which we gained in the last 20 years from numerous practical applications. These experiences are flowing directly into our Projects and Services.

The most important capital is however our staff. The members of the staff form the basis of our corporate success and they guarantee our customers excellent results from the planning up to the implementation of their Projects.

The Development Department in our Company ensures that modern technologies are translated targetedly and quickly into our products. Due to our flexibility we are in a position to offer you tailored, individual and one-stop solutions.

IBS

– the brand neutral Building Management System for Buildings with prospects

Having performed more than 1.000 software installations all over the country, we are the market leader in the area „brand neutral Building Management Systems“ in the German speaking Region. Thereby we put the focus on the economic migration of existing installations with a future extension of „Standards“ like BACnet, LonMark, KNX, EIB, M-Bus, Modbus or OPC. The integration of foreign brands is no problem for our Company. Due to the modularly structured software packages we can offer you a concept, which is exactly tailored to your demands and the requirements of your objects.

As to the communication we support the already existing transmissions paths like RS232, RS485, switched connections as well as Intra- and Internet. By integrating future technologies into proven structures, we can guarantee that you only invest into products of the latest generation. Thereby we adapted proven IT-Technologies for our System. If you opt for our system, you will get a system which is user-friendly, well thought-out and reliable. With our efficient Software we offer you the necessary investment security and we guarantee, that your properties will maintain its values.

System optimization

A Building Management System is the basic premise for a secure, ecologic, economic and energy-efficient operation of buildings and properties. However, the complete achievement potential may only be utilized by an integral concept which includes a comprehensive Service.

When realizing your Projects we will provide you a contact partner who will supervise all technical crafts. Thus we act on the request of our customers, because bundling performances creates further efficiencies. Proximity to customers and an intensive cooperation play a decisive role in our Company. We gladly face up to the daily challenge to satisfy the demands of our customers. Our performances comprise the planning, execution as well as the following optimization once the system is running.

The IBS is utilized by our company and by certified System Partners in the Federal Republic and adjoining countries. Thus you may call the Service also from a System Partner being located near you. Our System Partners know the IBS-Software in the minutest detail and they offer a maximum Service, efficiency and security. Alternatively you may render those Service also by yourself, provided you attended the necessary training. Due to our widespread offer of Services and our varied Services we shall increase the lifetime and availability of your facilities and we will minimize the operating costs. Let's think ahead and take advantage already today of tomorrow's technology

We're happy to help you

Does one of the following statements also apply to your installations?
Then please contact us still today.

– We're happy to help you!

- We want to use in future BACnet but we have to integrate our existing installations
- We are searching for a native BACnet-Management System and a neutral Building Management System
- We want to have competition on the DDC-level and we focus on a direct integration without BACnet
- We have numerous DDC-brands in our properties which cannot be connected to the existing Building Management System
- Our original supplier installed a system which is discontinued and no longer supported
